

Hot wax pressure tank system

Article-Nr.: 140-104-1

Technical Data:

Temperature range: 0-95°C
Operating voltage: 230 VAC
Tank volume: 12litres / 24litres
Tank pressure: max. 3 bar (recommended 1 bar)
Atomizing pressure: max. 3 bar (recommended 1 bar)
Hose length: 7,5m / 10m

Benefits at a glance:

Easy handling without pre-melting
Material can remain in the system - no flushing necessary
Handy and flexible hose system
Fully insulated pressure tank with integrated strainer
Independent heating of tank and hose
Spraying in all directions possible
Can also be used for oil and oil-wax combinations
Material supply for automatic spray guns or robots
Optional: agitator and/or level probe
